

DASHBOARD PORTAL+™

The Control Center of CUSTOMER+[®]

Responsive Solutions' **DASHBOARD PORTAL+** provides a robust administrative user interface that can be accessed by you and your clients. This intuitive and flexible interface requires minimal technical expertise.

Administrators can navigate through several easy-to-use screens to set up each client and define requirements based on their individual customer. Multiple clients can be managed within one portal and can be separated into individual groups to help manage and view only their own assets. Detailed online reports are also available and can be presented to end users as value added services.

All of the complex processes of managing several customer sites from separate management portals are eliminated and streamlined within one easy-to-use interface. This robust core functionality allows multiple customers to be managed within one storefront, making it more efficient and cost-effective.

Features/Benefits

- **Integration and Continuous Workflow**

DASHBOARD PORTAL+ is the control center of the CUSTOMER+ suite of products. It houses all of the administrator functions and responsibilities. All applications within CUSTOMER+ are integrated through this portal providing an end to end, continuous workflow for all of your printing and marketing communication needs.
- **Easy-to-Use Interface**

Within the **DASHBOARD PORTAL+**, you can easily set-up and manage your assets, groups, end users, and backend responsibilities through one efficient interface without having to migrate to another system or different interface. Based on the login information, you can control who has access to the administration tab and all of its functions.
- **Comprehensive Reporting**

The reporting module can calculate 17 stock reports ranging from users, groups, and specific transactions to more detailed warehouse management reports. With these online reports, you can gather information and identify who is using the system, how they are using it, and what they are using it for. These reports can also determine the status of an order for better customer service and provide you with important order information that you can use for billing. Reports can be run for any date range and are exportable to Microsoft Excel.
- **Style Management**

Using **DASHBOARD PORTAL+** you have the functionality to style each customer site. You can utilize CSS style sheets to manipulate the color schemes, fonts, and category images to personalize your site to your specific clients needs.
- **Sophisticated Security Model**

There are over a hundred different levels of security built and integrated into the modules. This allows you to house multiple customers within one central storefront, keeping all of their individual assets separate from one another. It also allows you to maintain and market your company by having them log into your branded site or you can customize the branding for each corporate user providing even greater flexibility within a secure interface.
